GOVERNMENT APPROVED — OFFICIAL REPORT

Disaster Assessment, Cost Estimation & Compensation Report

Assessment ID **ASM-20261101-MRUA** | Assessment version **1** | Report version **1**
Report generated **2026-11-01T11:30:10.275879+00:00** by **Ananya Patel** (Insurance Recovery Officer)
Assessment engine **assess-engine/1.1** | AI narrative source: deterministic-template (AI unavailable)

1. Disaster & affected region

Field	Detail
Region	Angul
Region key / code	IN-OR-NGL / IN-OR-NGL
Country / State	India / Odisha
Hazard	Cyclone (cyclone)
Affected areas	Angul, Odisha; Test
Overall confidence	Low
Assessment created	2026-11-01T11:29:41.308684+00:00 by Ananya Patel

2. AI-generated assessment & reasoning

Preliminary assessment for Cyclone affecting Angul (region key IN-OR-NGL). Estimated affected people: 4. Total estimated damage: Rs.7,900,000. Evidence: 0 task(s), 0 field report(s), 1 damage submission(s), 0 expense record(s), 0 evidence attachment(s). Gaps: No operational tasks exist for this region yet. No field reports exist for this region yet. No expense records exist for this region yet; cost figures fall back to modelled proxies or Unknown. No linked evidence attachments exist for this region yet. All figures are planning estimates with stated assumptions; none are official decisions.

1. Affected people derived from 1 households summed across 1 officer damage submission(s).
2. Housing loss from 1 damaged + 1 destroyed houses (sums of 1 damage submission(s)).
3. Crop loss from 1.0 affected hectares (sum of 1 damage submission(s)).
4. Livestock loss from 11.0 head lost (sum of 1 damage submission(s)).
5. Infrastructure loss from 1 sites + 1.0 km roads (sums of 1 damage submission(s)).
6. Total damage sums 4 of 4 damage lines.
7. Preparation cost unknown: no task activity, expense records, or observation.
8. Recovery cost modelled as 12% of damage.
9. Indicative relief envelope computed as a planning share of damage.

3. Estimated damage & costs (AI vs approved)

Item	AI estimate	Approved figure	Confidence
Estimated affected people	4 people	**4 people**	Low
Housing damage	Rs.650,000	**Rs.650,000**	Low
Crop damage	Rs.30,000	**Rs.30,000**	Low
Livestock loss	Rs.220,000	**Rs.220,000**	Low
Infrastructure damage	Rs.7,000,000	**Rs.7,000,000**	Low
Total estimated damage	Rs.7,900,000	**Rs.7,900,000**	Medium

Item	AI estimate	Approved figure	Confidence
Preparation expenses	Unknown	**Unknown**	Low
Recovery expenses	Rs.948,000	**Rs.948,000**	Low
Indicative relief envelope (planning only)	Rs.1,975,000	**Rs.1,975,000**	Low

Approved totals: damage Rs.7,900,000 (derived) | preparation Unknown | recovery Rs.948,000 | grand total Rs.8,848,000

The indicative relief envelope is a planning figure only; it is not an eligibility decision, offer, or sanction.

4. Calculation, assumptions, sources & explanation

Estimated affected people — confidence Low

Calculation: 1 households (sum of 1 damage submission(s)) x 4.4 people/household = 4 people.

Explanation: Submission-based headcount is a planning estimate. Deduplicate against field verification before relief lists.

Assumptions: Average household size 4.4 is a planning default; replace with census value.; Sums officer submissions; overlapping reports of the same households may double-count.; Regional population is context only and was not used as affected population.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Housing damage — confidence Low

Calculation: 1 x Rs.150,000 + 1 x Rs.500,000 = Rs.650,000 (counts from sums of 1 damage submission(s)).

Explanation: Repair-vs-rebuild split follows officer counts; survey data would raise confidence.

Assumptions: Unit rates are configurable planning defaults, not official SDRF/NDRF schedules. Verify against current government norms before official use.; Assumes uniform damage severity within each category.; Sums officer damage submissions; overlapping reports of the same damage may double-count — verify before sanction.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Crop damage — confidence Low

Calculation: 1.0 ha (sum of 1 damage submission(s)) x Rs.30,000/ha = Rs.30,000.

Explanation: Crop-cutting experiments and mandi prices are needed for a claim-grade figure.

Assumptions: Unit rates are configurable planning defaults, not official SDRF/NDRF schedules. Verify against current government norms before official use.; Assumes a single average crop value per hectare.; Sums officer damage submissions; overlapping reports of the same damage may double-count — verify before sanction.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Livestock loss — confidence Low

Calculation: 11.0 head (sum of 1 damage submission(s)) x Rs.20,000/head = Rs.220,000.

Explanation: Species-wise counts would improve this estimate.

Assumptions: Unit rates are configurable planning defaults, not official SDRF/NDRF schedules. Verify against current government norms before official use.; Assumes average value across species; verify with veterinary records.; Sums officer damage submissions; overlapping reports of the same damage may double-count — verify before sanction.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Infrastructure damage — confidence Low

Calculation: 1 x Rs.2,000,000 + 1.0 km x Rs.5,000,000/km = Rs.7,000,000 (counts from sums of 1 damage submission(s)).

Explanation: Engineering estimates per asset are needed for sanction-grade figures.

Assumptions: Unit rates are configurable planning defaults, not official SDRF/NDRF schedules. Verify against current government norms before official use.; Assumes average site/road restoration cost.; Sums officer damage submissions; overlapping reports of the same damage may double-count — verify before sanction.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Total estimated damage — confidence Medium

Calculation: Housing damage Rs.650,000 + Crop damage Rs.30,000 + Livestock loss Rs.220,000 + Infrastructure damage Rs.7,000,000 = Rs.7,900,000.

Explanation: Arithmetic sum of the damage lines above; inherits their uncertainties.

Assumptions: Unit rates are configurable planning defaults, not official SDRF/NDRF schedules. Verify against current government norms before official use.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Preparation expenses — confidence Low

Calculation: No observed spend, no expense records, and no task activity; cannot compute.

Explanation: A rough activity proxy. Record preparedness expenses to replace it.

Assumptions: Unit rates are configurable planning defaults, not official SDRF/NDRF schedules. Verify against current government norms before official use.; Assumes one task-day of effort per submitted task.; Task-count proxy is a rough planning fallback, not observed spend.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00)

Recovery expenses — confidence Low

Calculation: Rs.7,900,000 x 12% = Rs.948,000.

Explanation: Planning share only; record recovery expenses as bills arrive.

Assumptions: Assumes debris removal + immediate relief scale with damage value.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. (at 2026-11-01T11:29:25.499249+00:00); historical disasters: Historical analogs (NOAA IBTrACS

cyclone tracks) need GET /api/history and were not fetched for this offline assessment; non-cyclone history is not integrated. (at 2026-11-01T11:29:25.499249+00:00)

Indicative relief envelope (planning only) — confidence Low

Calculation: Rs.7,900,000 x 25% = Rs.1,975,000.

Explanation: A budgeting envelope for discussion. Only the approved government decision creates obligations.

Assumptions: NOT an eligibility decision, NOT an offer, NOT a sanction. Eligibility is decided solely by the government.; Share is a planning default for budgeting discussion.

Sources: regions.json: Region record for 'IN-OR-NGL' (at 2026-11-01T11:29:25.499249+00:00); hazards.json: Hazard record for 'cyclone' (at 2026-11-01T11:29:25.499249+00:00); tasks.json: 0 task(s) in region, 0 submitted (at 2026-11-01T11:29:25.499249+00:00); field reports: 0 report(s), 0 people assisted in total, 0 photo(s) across reports and evidence attachments (at 2026-11-01T11:29:25.499249+00:00); damage_assessments.json: 1 officer damage submission(s) for this region and hazard (at 2026-11-01T11:29:25.499249+00:00); expenses.json: 0 expense record(s): 0 preparedness (Rs.0), 0 recovery (Rs.0) (at 2026-11-01T11:29:25.499249+00:00); evidence_attachments.json: 0 linked evidence attachment(s) (at 2026-11-01T11:29:25.499249+00:00); geo gazetteer: Angul, Odisha, India (context only) (at 2026-11-01T11:29:25.499249+00:00); disaster intelligence: Hazard/region resolved against the local catalog only. Live telemetry, active systems, and official warnings need GET /api/disaster-intelligence/{region}?hazard=... and were not fetched for this offline assessment. 7. Supporting evidence & data sources

Tasks in region: 0 (0 submitted) | Field reports: 0 | People assisted: 0 | Verified corrections for hazard: 0

Damage submissions: 1 | Expense records: 0 (preparedness Rs.0, recovery Rs.0) | Evidence attachments: 0 | Photos: 0

Population context: Ambient regional population (WorldPop, via GET /api/population) is context only and is never used as affected population. No cached value is available locally; quote the live readout next to this assessment when needed.

Evidence gaps: No operational tasks exist for this region yet. No field reports exist for this region yet. No expense records exist for this region yet; cost figures fall back to modelled proxies or Unknown. No linked evidence attachments exist for this region yet.

Insurance: No insurance policy, payout, or transaction ledger is connected to this system. Parametric trigger status must be evaluated separately from disaster intelligence for this region and hazard, and any claim requires authorized insurer review. This assessment makes no insurance decision.

Disclaimer: Preliminary planning estimates generated from available local data with stated assumptions. Not an official approval, eligibility decision, insurance decision, or payment instruction. A Role 4 officer must review and decide.

Snapshot: approved figures frozen at version 1 on 2026-11-01T11:30:06.307827+00:00. Historical records are immutable; later engine updates never alter this report.
